

GW 300 D PORTABLE DIESEL 3000 RPM WELDER/GENERATOR

STANDARD FEATURES

300 amps DC welding current
Multi voltage AC power outlets:
8KVA at 415 volt three phase
7KVA at 240 volt single phase,
4KVA at 110 volt single phase
Brushless alternator
Smooth waveform
Low oil level cut out device with warning light

Low oil pressure warning light
Capable of welding Cellulosic welding rods
Complies to EEC noise regulations
110voltCTE(55v55v)
Circuit breaker protection
Battery charging warning light
Powder coated paint finish
Owner technical manual and parts book
Electric start
Compact design
Voltmeter
Hour meter
High frequency protected
Low fuel level shutdown with warning light
Thermal Overload Protection
Remote control facility
Arc force regulator switch
Circuit breaker protection on 110 power outlet
ELCB protection on 415v and 240v power outlet
Central lifting eye
Fuel gauge
Wheel barrow type handles and wheels
Auto idle

BENEFITS

Allows you to weld up to a 6mm welding rod
Can be used as either a generator or welder or both

APPLICATIONS

Medium to heavy industrial use Fabrication & Engineering Shops
Mining, Drilling & Refineries
Generator applications i.e. on site power tools, lighting as well as domestic applications
